

User guide for E-filing Application

CONCOR has started E-filing software for EXIM locations, which is web-based application. This is operational for importers/exporters/shipping agents/JV's/CHA's. The objective of this software is to provide single platform for entire import/export trade to perform online, all the commercial transactions from their office itself or from anywhere. This will in turn provide the trade savings in terms of time, energy and at the same time faster clearance of containers.

Through this Application, any customer can file their documents including billing and take necessary output's for their container/cargo lying at any of the CONCOR's EXIM terminals at any point of time.

Below mentioned are some of the Queries/Reports/Activities available under this Application:

A. Queries

1. Container movement history

-Just by entering container number, one can find out movement history of the container for the current cycle of the container.

2. Container Details query

-Just by entering container number, one can find out present status of the container.

3. PDA Balance Enquiry

-Customer can find out the available balance amount in his Pre-deposit Account online.

4. EA wise Query

-This query is specific to export containers.

5. Shipping bill wise query

-This query is specific to export containers.

B. Reports

1. Export IWB printing

-Any registered shipping agent can take printout or save the Export IWB for the containers originating from any terminal online.

2. Electronic IWB

-Any registered shipping agent can take printout or save the Import IWB for the containers destined from any terminal online.

3. PDA Balance Statement

-Any registered user can take printout or save the PDA statement of his PDA account online.

4. Duplicate Receipt Generation

-Any registered user can take printout or save the Receipts online.

C. Activities

1. Export Application – Factory

-Through this option user can online generate EA for factory, by key-in the required details, after arrival of container at terminal.

2. Export Application – Outline CFS

-Through this option user can online generate EA for Outline CFS, by key-in the required details, after arrival of container at terminal.

3. Export Booking Factory/ Outline CFS
